

Before you crochet a bonnet

A preparation worksheet to use alongside an original designer pattern.

Original pattern title, designer and URL

Chosen size and US / UK stitch names

Yarn: fibre, weight, length per ball; hook used

Keep pattern targets and your own measurements separate.

Measurement	Pattern target	My sample
Gauge stitch / method		
Stitches over stated width		
Rows over stated height		
Brim path and length		
Depth path and length		

Before committing to the whole project

- ☐ Use the designer's exact measurement points and gauge stitch.
- ☐ Record "not stated" where a target is missing; do not invent a size.
- ☐ Check the original pattern's fit, finishing and intended-use notes.

Planning sheet only; not a bonnet pattern, tested fit recommendation or certification of safety. Keep the original designer instructions with your notes.
